EXPERIENCE

HuddleUp (Remote) March 2022 - June 2022
Software Engineer Intern

- Collaborated with frontend team to **build a custom LMS (Learning Management System)**.
- Executed web pages for adding new channels, challenges, and quizzes to a specific workspace, that can be utilized by client companies to impart most relevant skillset to its employees.

DA-IICT Research Lab (Gandhinagar, India) January 2022 - June 2022
Research Intern

- **Curated the largest open-source dataset** (comprising of **7805 datapoint**, which is **4 times larger** than previously available largest public dataset) for Corporate Credit Rating with Financial Ratios (Dataset Link).
- Devised a set of **time-independent, simple if-else rules** based on financial ratios to **help corporate firms attain investment grade rating** with a mean precision value of **95%**.
- Boosted **interpretability of results** by applying **Explainable AI technique (decision Tree)** for prediction and visualization purpose.

DA-IICT in association with the **Institute for Plasma Research (Gandhinagar, India)** October 2020 - August 2021
Research Intern

- Designed an **efficient serial algorithm for generating the synthetic images of plasma**.
- Added **noises of 3 different distributions** to construct **more realistic** plasma images.
- **Parallelized the developed serial algorithm** (with OpenMP API) for creating a synthetic image of plasma in **0.65 seconds** (**21 times faster** than serial algorithm).

Indian Institute of Technology (IIT) – Bombay (Remote) April 2020 - June 2020
Summer Intern

- Built **custom plugins** for content migration from Drupal 6 and 7 to Drupal 8 (Fellowship Report).
- Explored Drush command line and Drupal UI to migrate Drupal websites.
- Migrated ***hss.iitb.ac.in*** from Drupal 7 to 8 **without any data loss**, using custom-made plugins and other modules.

PROJECTS

Real-Time Chat App | *React, Node.js, MongoDB, Socket.io, CSS*

- Coded a **real time web app for chatting, synced with Google account**. Users can converse with multiple contacts, and can see whether another person is currently logged in or not.
- **Read messages are differentiated from unread ones** by different color codes (Link to web app).

Job Search Portal | *Next.js, MongoDB, Tailwind CSS*

- Launched a **fully responsive social media platform**, allowing users to post job seeking/opening information.
- Implemented theme toggle, and latest news posting (using Google API) feature (Link to web app).

Hierarchical Clustering of World Cuisines | *Python, Pattern Mining, Postman API*

- Characterized unique features central to 25 different world cuisines in an attempt to **establish inter-relatedness of these world cuisines** (using *FP-Growth Algorithm*).
- Produced 3 dendrogram (for distinct distance metrics) to **visualize the interrelationship between different world cuisines** using Hierarchical Clustering technique.
